

Paramount Metal Finishing's RFQ Guidelines

These guidelines are designed to help Paramount Metal Finishing's sales team determine what information is needed in order to provide an accurate quotation as well as provide high quality finishing and complete customer orders in a timely manner.

Quotation Guidelines:

- Title, Part Number, and Revision of Specification required.
- Detailed part drawing.
- Surface Area of part, this will help with quotation.
- Material of part.
- Weight of part.
- Quantity of Parts to be released at a time or EAU (Estimated Annual Usage)
- Type, Class and Grade per the Specification required.
- Thickness of plating required.
- Type of material and hardness of material.
- Permissible pretreatments if other than specified
- Stress relief treatment, if required.
- Hydrogen Embrittlement Relief (HER), if required.
- Masking requirements, if any.
- Significant surfaces, if required.
- Points of measurement, if required.
- Special packaging requirements.
- Lot acceptance testing, other than specified, such as: Hydrogen Embrittlement Testing, Coating Weight, Salt Spray testing...
- For painting or powder coating: same as 1-7 above
- Pretreatment or pre cleaning, if required
- Primer specification, if required.
- Topcoat specification, if required.
- Color numbers of primer and/or topcoat and/or powder.
- Masking requirements, if any.

Thank you.
